

Healthy pet Club

What is it?

Our Healthy Pet Club provides the routine preventative veterinary care that your pet will need throughout the year. Joining the club allows you to budget with monthly affordable payments and make substantial savings.

What does it cover?

The monthly payment covers:

- Twice yearly health assessment
- Annual routine vaccination
- All year round worming
- All year round flea control

All at a 15% discount.

Are there any other discounts?

The following are also automatically discounted for Healthy Pet Club members:

- Initial consultations
- Neutering
- Microchipping
- Additional vaccinations
- Additional wormers
- Additional flea treatment

And FREE:

- Additional nurse appointments
- Regular weight assessments
- Nutritional advice.

How much does it cost?

Costs are as follows:

Plan	Monthly payment	Min yearly saving
Cat	£10.21	£21.63
Small dog	£10.14	£21.47
Medium dog	£11.37	£24.08
Large dog	£14.20	£30.07
Very large dog	£22.17	£46.95

As you can see substantial savings can be made and these figures do not

include the 15% discount off the vaccination when you sign up, or all the other discounts listed above.

Is it an insurance policy?

No, the Healthy Pet Club gives you discounts off of preventative treatment which is not covered by insurance policies or by the PDSA PetAid scheme, so it complements both of these.

How do I join?

To join our Healthy Pet Club, just complete our registration form when your pet has it's initial vaccination or booster. You will get a 15% discount off this vaccine, and you will pay for next year's booster and 12 months flea and worm treatment in monthly installments at 15% off. You will need your bank details to set up a direct debit. If you would like further information, our staff will be happy to answer any queries.

Microchip Details

Many pets are microchipped nowadays – if a pet is ever lost, he or she is easily identified. At only £19.97 including lifelong registration (or £16.97 if your pet is in the Healthy Pet Club) it is cheap security.

It is important to remember that the scheme only works if contact details are kept up to date. If you move house or change any of your contact details, you need to let the database know. It's worth remembering that when you go on holiday, the database still needs to be able to contact someone. Change your details temporarily if necessary.

Pets Passport

The Pets passport scheme, which allows dogs and cats to travel to mainland Europe as well as some other countries, will be greatly simplified from 1st January 2012.

From this date, your pet will need a microchip, then a single rabies injection. The Pets Passport can then be completed. Your pet will be able to travel from three weeks after the injection date.

Your pet will no longer need to have a blood test or to wait for six months before returning to this country. The whole process will now be much easier, quicker and cheaper.

Fireworks

Firework season will soon be here and, if you have a dog that's frightened of fireworks, it's worth thinking ahead.

The old method of prescribing sedatives is unhelpful as they don't stop the dog being scared, it just can't react and the problem gets worse each time.

There are several things that we can do that will make a difference such as pheromones that have a calming effect as well as drugs to help with anxiety.

These methods are best started at least two weeks before fireworks are due, and continued until the fireworks are over. Please ask if you think this might benefit your pet.
